Dear Sir, -- We received to-day returns on bars of gold and silver bullion, and are completely at a loss to know why you made no returns for the gold, as they contained between .060 and .075 of gold. In fact your returns have shown .080 of gold for this same material in former lots, etc. We thank you very much for returning the bottoms, and onl, wish that you had sent back the whole lot. Will you not be at some pains to investigate this matter, re-assaying if possible, as we are under considerable loss as the matter now stands.

Yours very truly,

Rockford Watch Case Co.
